From Our Students

Here is what they are saying about our courses

I came into this course already having taken a competitor course. I can say after that I knew everything I needed to pass the 107 exam. My first impression of and mental reactions to this course was "Too Much Information... you don't need to know all this to pass the test". Thankfully I was patient and gave the instructor the benefit of the doubt because there is a major difference between the other course and this one which can be summed up in the following. This course will give you more than enough information to MASTER the actual knowledge and be a competent professional in the UAV/FAA world. ABSOLUTELY AWESOME COURSE AND I'M NOW LOVING IT! I recommend this material to ALL UAV pilots who want to master the information and become safe, responsible and professional commercial drone pilots. WELL DONE!
